The wildcard characters have the following meanings: * can match zero or more characters. ? can match exactly one character. Any other character in the pattern must match the corresponding character in the input string exactly. Print 1 if the input string matches the pattern; otherwise, print 0.

Input Format

The input consists of two lines:

The first line contains the input string. The second line contains the pattern string.

Constraints

1 ≤ length of string ≤ 10^5 1 ≤ length of pattern ≤ 10^5 The string contains English letters and digits. The pattern contains English letters, digits, *, and ?.

Output Format

Print:

1 if the input string matches the pattern. 0 if the input string does not match the pattern.

Sample Input 0

```
abcabcccda?cd
abcabcccda?c*d
```

Sample Output 0

```
1
```

Sample Input 1

```
abcabcccd
a?c*c
```

Sample Output 1

```
0
```

```
p = input().strip()

i = 0
j = 0
star = -1
match = 0

while i < len(s):

    if j < len(p) and (p[j] == s[i] or p[j] ==
        i += 1
        j += 1

    elif j < len(p) and p[j] == '*':
        star = j
        match = i
        j += 1

    elif star != -1:
        match += 1
        i = match
        j = star + 1

    else:
        print(0)
        break
```

Line: 38 Col: 1
